About Teaching Skills Certifications

Knowledge alone is not sufficient to produce efficient learning outcomes.

A teacher must acquire skills that will help her to work innovatively to bring about a conducive learning environment creating cohesion between the elements of teaching and learning.

Good pedagogic leadership, Cooperation with others and efficient administration help in developing good teaching skills.

The Certification of teachers leads to an effective end to evaluate the learning and process of skill upgrade.

Primary years of schooling lay a strong foundation for a life-long learning and a sound value-system for children. The teacher plays a very significant role as she provides space to children to question, comment, explain, reflect, analyze, infer, imagine and critique. She also provides opportunities for cooperative learning.
